

INFIMA Camp: Open Support to All Scientific Fields

Aug 24, 2017

The International BURCH University hosted an INFIMA Camp, which brings together all the talented students in the field of mathematics and physics, and prepares them for the upcoming competitions.

This year, 135 high school students from all over B&H applied to the educational camp, bringing together students from Zenica, Tuzla, Bihac, Banja Luka, Bijeljina, Prijedor, as well as representatives of "Global Education" educational institutions.

Preparatory classes will take place in order to improve the knowledge for upcoming competitions in these areas as well as to improve the previously acquired knowledge in the field of mathematics and physics. Students within the camp, besides the offered knowledge, are provided the possibility of lodging, food, but also hanging out and meeting with their peers.

Rector of the International Burch University, Prof. Dr. Damir Marjanovic, as host of the INFIMA Camp, also welcomed young and diligent girls and boys this year and wished them luck in the competition and in their work.

"We are extremely happy and I am honored and pleased that we can support the development of mathematics and physics in this form, and whenever we are asked to do so, we are ready to provide support not only when it comes to mathematics, physics, and informatics, but also to other scientific fields" said Prof. Dr. Damir Marjanovic, Rector of the International Burch University.
