

BURCH and ASUBiH Organize Coding Weekend school for High school students

Sep 27, 2018

International Burch University in cooperation with the Association of High schoolers in Bosnia and Herzegovina organizes Meet and Code, a Coding weekend school for high school students.

The event aims to introduce high school students to the world of programming and Arduino technology through creative interactive workshops, thus stimulating them to choose a career in the IT sector. Arduino platform is a flexible combination of hardware and software, which is also easy to use. Designed for beginners, this workshop gives students the opportunity to learn how to use Arduino with some basic electronic components such as LEDs, resistors and sensors.

For easier accessibility to students, the event will be held in following cities and periods: in Sarajevo on October 6 and 13, in Tuzla on October 20, in Zenica on October 7 and 21, and in East Sarajevo on October 14.
