

## IBU students at Hackaton

Dec 17, 2018

*Students of the Department of Information Technologies, within the Faculty of Engineering and Natural Sciences, were part of the EPBiH Hackathon and won third place.*

At the competition organized by the JP Elektroprivreda BiH d.d. Sarajevo and Microsoft BiH were seven teams from 4 universities in Sarajevo. The competition lasted 24 hours and teams should have used that time to develop a software for improving customer relationships through mobile applications, smart home applications, energy efficiency management applications and educational games for children.

Our students Haris Jašarevic, Ida Bajrami, Aldin Beriša, and Mehmed Tukulic were part of a team "Brewing Java" that took third place.

Organizers say this is a way to give young and innovative people the opportunity to get to know more about the business processes and platforms used by the company.
